

NOTICE: HOW TO CLOSE BULK BAGS

To prevent losing containers during the pick up and shipping process, make sure all bulk bags are closed as per these instructions.

Instructions apply to all bulk bag sorts except sorts #2 and #4 which do not require their bulk bags to be closed.

1

Make sure the bulk bag is filled correctly as per instructions for its sort. No items should overflow from the bag.

2

Pull out the top (white duffel fabric) and hold it as high as possible above the body of the bag (green fabric).

3

Gather all sides of the duffel top together. Ensure there is no loose fabric.

4

Use the attached rope to secure. Bring the loop over and around the gathered duffel.

5

Pull on the rope and push the locking mechanism towards the centre of the bag until the rope is very tight.

6

Activate the lock.

7

Make sure the tag remains on the bulk bag's handle. Do not remove before or during pick up.

OPTION FOR SORT 3 BULK BAGS PICKED UP BY NEXGEN

You can opt to keep the top of the bulk bag open in order to expedite the shipping process. Simply pull out the top (white duffel fabric) from the body of the bag (green fabric) and leave it open and loose. Do not secure with rope and do not add additional containers in the white duffel top area.
