

IMPORTANT UPDATE: Ceramic Beverage Containers Will No Longer Be Accepted at New Brunswick Redemption Centres

Due to the challenges associated with recycling ceramic, this material is currently being phased out as a material type for beverage containers.

Only a few alcohol beverage products over the years have been sold packaged in ceramic containers. The remaining inventory for such products is expected to be removed from circulation by July 31, 2023.

Redemption centres will continue accepting these containers and issuing customers their deposit refunds.

We are asking for your assistance and encourage you to take prompt action and please return any empty ceramic beverage containers you may have to your local redemption centre before March 31, 2024.

We appreciate your ongoing support and dedication to a greener future.
