

HOW TO SORT & BULK DEPOSIT-BEARING BEVERAGE CONTAINERS

REFILLABLE GLASS (BEER)

27

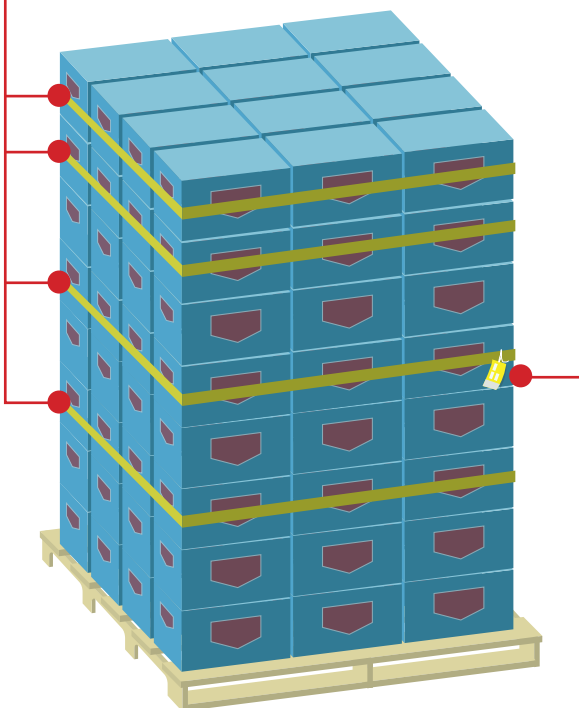

Refund to your customers: All refillable beer bottles are worth a 10-cent refund.

Put refillable beer bottles in cardboard cases. Stack the cases on a pallet up to 5 or 8 tiers high.

All refillable beer bottles should be intact.

Tie string around the 3rd and 5th tier. If 8 tiers, also tie string around the 7th and 8th tiers.

Attach completed tag to the 5th tier string.

Affix *EnSys-Connex* POS shipping label to Encorp yellow tag. If no access to printer, manually fill out the tag. Enter the quantity of individual bottles (not dozens).

TYPES OF REFILLABLE BEER BOTTLES

Refillable beer bottles can be recognized due to the threads they have at the top (used to screw on the cap).

Industry Standard Bottle (ISB)

The ISB is a brown glass container that holds 341 ml of beer. Many brewers use ISB bottles.

Proprietary Refillable Bottle

Some brewers use proprietary refillable bottles. These bottles are of similar shape and size to the ISB, but are usually green or clear.

Pallets of refillable beer bottles get picked up by either one of these three service providers (carriers), based on your redemption centre's location (same service provider that you are already working with):

- Armour Transportation Systems (1-800-561-7987)
- G. M. Rioux (1-506-473-5034)
- O. C. Maillet Transport (1-506-955-3891)

These drivers do not have scanners. They will leave a paper packing slip with handwritten information confirming quantities picked up. All pallets will then be scanned at their respective off-loading facilities.

Junk bottles (chipped and broken bottles) must be palletized separately and clearly marked as "JUNK".
